

ARBC GARDEN TABLE KIT: ASSEMBLY INSTRUCTIONS

1. Choose the best (face) side and lay the slats face down on a clean flat surface. Insert the bolts with the thread facing up. Position one table end over the slats, locating the bolts in the holes (this is easier with two people). Fit the washers & bolts to finger tight only.
2. Repeat for other end.
3. Check for square and tighten bolts.
4. The ends will now be slightly in tow which is OK.
5. Fit the 2 cross straps using the 20m/m SS screws.
6. Bolt the 2 angle braces to the ends and screw the other end to a slat. Do not try to straighten the ends. They should be in camber.
7. Turn the table the right way up and tighten bolts using a screwdriver and spanner.
8. The hardwood is very durable and needs only oiling in the spring and before winter with "Homebase" teak oil.
